

The “Perfect Solution” Glider

A smooth operating space-saver

This versatile *Infinity*® Glider is the ideal answer when you’re looking for simple operation, energy efficiency and reliable performance.

If your gliders don’t “glide” anymore or you have a space where a swinging sash would be in the way, the *Infinity*® Glider is the perfect solution. These durable, energy-efficient windows operate smoothly and seal tightly against air and water infiltration. Made with tough, dependable *Ultrex*® fiberglass inside and out, our Gliders are virtually maintenance-free. You’ll also appreciate the superior performance and long-term energy cost savings provided by standard Low E II with argon insulating glass. Cleaning the glass is simple with tilt latches that allow you to remove the operable sash for easy access.

The operating sash slides effortlessly and can be removed and reinstalled for easy cleaning.

Available in many operations

Choose left-operating or right-operating sash.

Triple-sash units are available with operating sash on both ends.
